US TRANSPORTATION COMMAND

Providing Commercial Ticket Program and Small Commercial Cargo Program Information to the Customer

This briefing is classified: UNCLASSIFIED

MAJ Mark Kelly
TCJ3-X-Contingency Branch
DSN 779-1045

"Warfighter Support – Nothing Else Really Matters!"

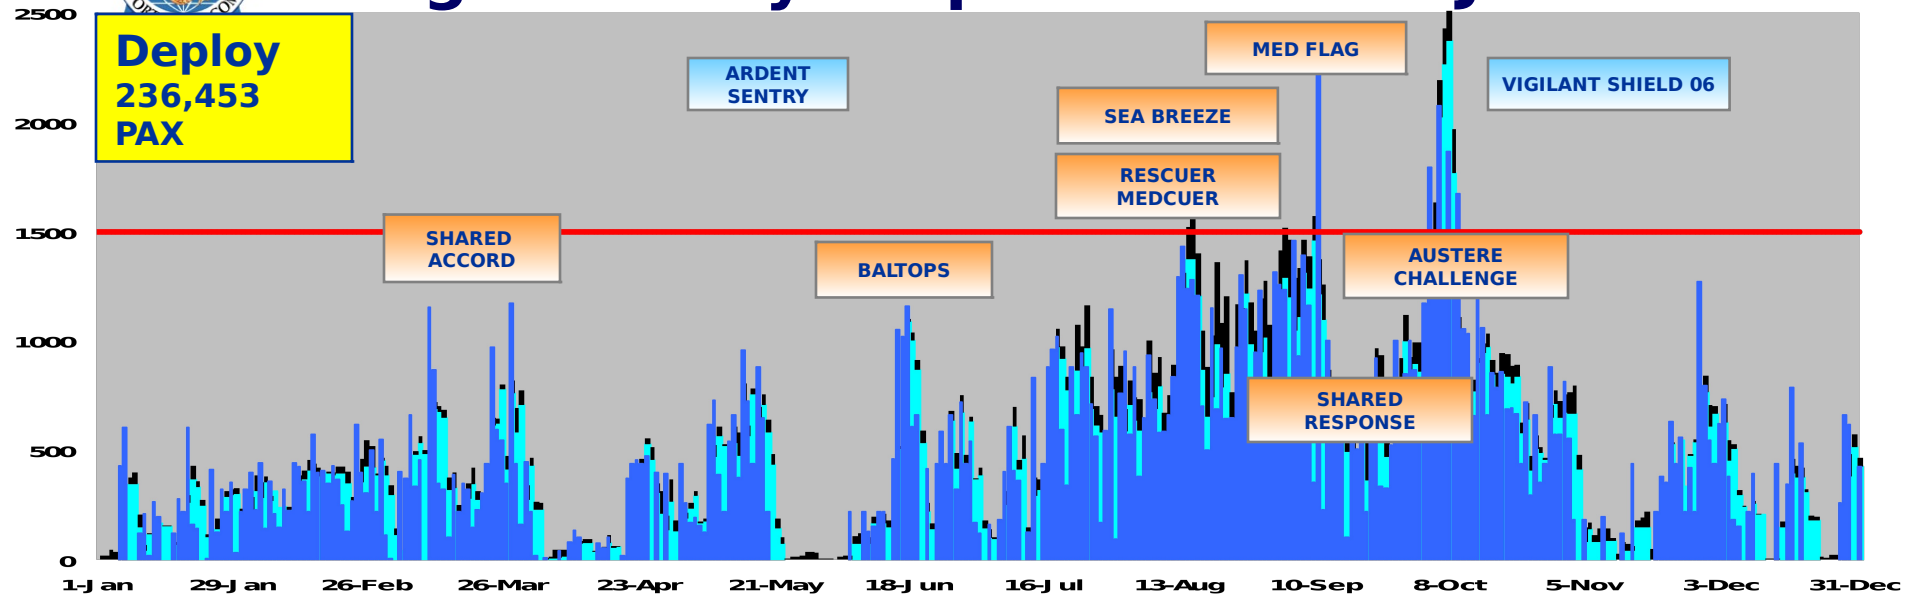
Issue

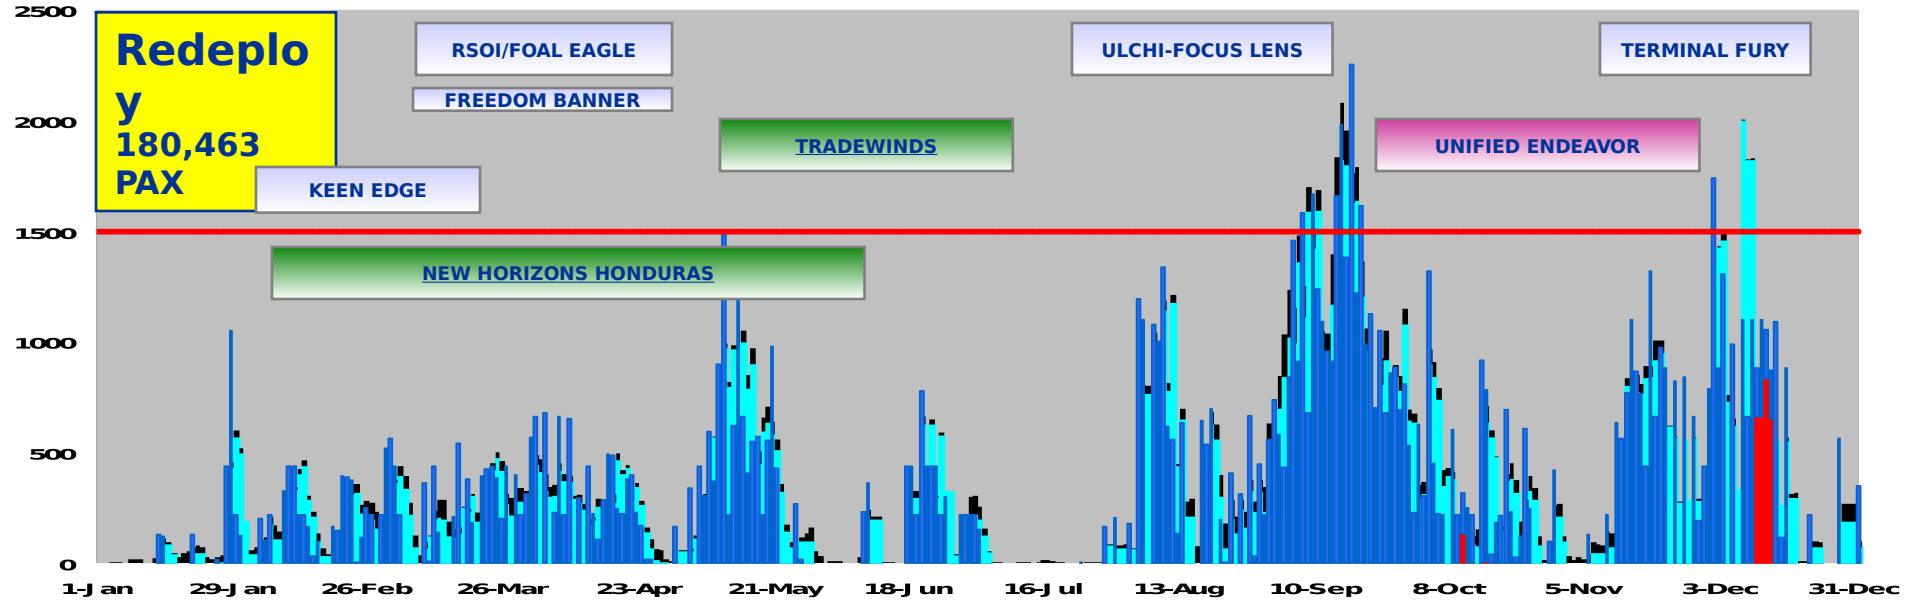
Competing Requirements for Limited STRAT Lift to Support the Chairman's Joint Exercise Program (JEP)

Agenda

- CY 06 PAX Demand Snapshot
- Planning Exercise Movement
- Objective
- Discussion
- STRAT Lift Options
  - Commercial Ticket Program (CTP)
  - Small Commercial Cargo Program (SCCP)
- Conclusion

CY06 Air Pax Demand
High Priority Requirements vs JEP





Planning Exercise Movement

- Plan for commercial deployment
- When possible:
  - Involve USTRANSCOM Planners early
  - Choose commercial airfields with support equipment
  - Validate on time
- Cargo
  - Assume contoured pallets for commercial aircraft
  - Use WRM stock or host nation equipment if possible
  - Move via sea-lift
- Passenger movement
  - Passengers move separate from cargo
  - 100 passenger minimum for charter aircraft
  - Plan for CTP/SCCP use
  - Ensure passengers have passports or that the host-nation will allow entry without passports

Objective

Provide Exercise Planners the method of accessing Commercial Ticket Program (CTP) and Small Commercial Cargo Program (SCCP) messages and information

Discussion

- Current CTP/SCCP message process “Static Message Postings”
  - Is not an efficient method of conveying CTP/SCCP information
  - Does not meet the customer’s needs
    - Not readily available to all customers
    - Does not reflect recently validated TPFDD changes
    - Information on released message is not the same as annual roll-up reports
  - Is a static display of information
- New Process:
  - Is inclusive of the latest CTP/SCCP validated TPFDD changes
  - Current as of the latest transaction by the USTRANSCOM action officer
  - SMS source data is replicated from JOPES TPFDD data
  - Accessible world-wide
    - Users require SMS login (JOPES account not required)
    - Messages and annual roll-ups reflect the same information

Accessing Information

- CTP and SCCP data products function similarly
- CTP demo only for this presentation
  - SCCP functionality is the same as CTP
- Single Mobility System (SMS) is the release system for USTRANSCOM
  - Agencies may release the information through internal channels such as newsgroups and email if desired

Accessing Information in SMS

Home Page
Welcome to the Single Mobility System!
SMS is a web-based computer system that provides visibility of air, sea, and land transportation assets and provides aggregated reporting of cargo and passenger movements. SMS does this by collecting plane, ship, and truck movement data from other computer systems such as GTN, CAMPS, GDSS, JALIS, DTTS, and ANGMU. SMS also provides requirement management and mission building services for the Air Force Reserve.

-Current as of the last USTRANSCOM AO changes

-Calculations based on same data as the CTP messages

Conclusion

- System provides information dynamically to the customer
- Cost of tickets are an estimate based on several factors
  - City pair fair cost
  - Travel agent price quotes
  - Online ticket prices
- Initial capabilities
  - SCCP messages
  - CTP Messages
  - Annual cost roll-up messages
